

# Economite HTD Series Power Gas Burners

## Linkageless Technology

★MADE in the USA★

Midco International has developed a 400,000 BTU high turndown burner. The Midco RE4400DS HTD burner is a fully modulating gas burner using a linkage less air fuel ratio control. The burner fires at 20,000 BTU's low fire and 400,000 BTU's high fire. The burner is ETL listed and comes complete with ignition system and gas train.

*Midco International is a world leader in power gas burners for the past 70 years. We have built reputation for excellence based on our innovative designs, fine products and commitment to customer service. Behind the technology and product durability, you will find the true secret to Midco's success is our people. The spirit of teamwork, from production line to the executive office and is an integral part of the [Midco pledge of putting our customers first.](#)*

**Midco Advantage Over the Competition:** Why buy a Midco burner over a competing product? There are two excellent reasons - One: We Fire Test Every Burner before shipping it out to you or your customer. Two: We stand on our reputation for excellent post order support on all of the Midco burners. Which is a highly prized benefit that is not always apparent or present when looking for the 'best price' in a product. We stand by our motto: "Quality Designed for Proven Performance".
